SPECIAL HOTICES.

RICHMOND, VA., WEDNESDAY MORNING, SEPTEMBER 30, 1885.

The Democratic candidates for the Legislature arranged appointments yesterday for commencing the canvass in this county. It will now go on vigorously to the end. The Prohibition

ticket makes no impression on the surface. It will be the ticket of the Republicans, which admonishes Demo-

crats to pass by on the other side. The Prohibition candidate for the Senate is a Republican, and the one for the House

of Delegates seems not to have distinct

political affinities.

DANIEL IN BRUNSWICK. Trouble in the Republican Camp- Diseat faction Over a Nummation for the Legisla ture-Pasteral Cull-Cotton-Factories to

Resume, &c.

PETERSBURG, VA., Sept. 29, 1885. Hon. John W. Daniel addressed a large assemblage of the people of Bruns-wick county at Lawrenceville yesterday. His speech is represented by those who heard it as having been one of great power and eloquence, and consumed over two hours in its delivery. Among his audience were a number of colored men, who gave him close and respect-ful attention. Colonel R. B. Berkeley and others addressed a Republican meeting at the same time, composed mostly of negroes. It is said that the white people of that county and section are more closely united in this cam-

paign than for years past.

To-day Major Daniel spoke at Hicksford, where there was an immense audience. Major Daniel has consented to speak in this city to-morrow night, and the Academy of Music has been en-

gaged for the occasion.

The Republican City Convention last night nominated Mr. Robert McCandlish and W. H. Jordan (colored) for the House of Delegates. Mr. McCandlish was one of the representatives from this city in the lower house in the last Assembly, and his renomination was generally conceded. But there were several applicants among the colored brethren for the other nomination, and the pressing of their respective claims caused much confusion in the Conven-tion, which the chairman and the sergeants-at-arms found it difficult to keep own. W. H. Jordan, a former em ployee in the custom-house, carried off the honor; but not without decided dissatisfaction among the friends of one or more of the other candidates, which threatened to result in another nomina-

At a meeting of the vestry of St. Stephen's (colored) Episcopal church, held last night, it was voted unanimously to extend to the Rev. Robert A. Goodwyn, of Roanoke county, a call to the rector-ship of the church, in place of Rev. Giles B. Cooke, recently resigned. Mr. Goodwyn has always shown great in-terest in the work of the Church among the colored people, and while it is not known whether he will accept this call

it is greatly to be hoped that he will. Master Willie Robertson, aged about twelve years, son of Mr. James B. Robertson, was very painfully injured last evening by a fall from a tall pair of stilts upon which he was walking.

Moses Bates (colored) was assaulted in Pocahontas last evening and very severely injured by Berry Newsom There has been trouble be tween the parties for some time, and Bates had endeavored to have Newsom bound over to keep the peace. The assault was made with a heavy piece of plank, and besides receiving other in-juries Bates had his shoulder dislo-

The Theatre Last Night.

The new Japanese comic opera, 'The Mikado," drew a brilliant house again last night, and the performance gave greater satisfaction than it did the night before. The house was delighted, and the showers of applause brought out encores so frequently as to almost make them tiresome. Mr. Denham sang with peculiar effect the song, "I'll Put Him on the List." This song is not an interpolation in the opera, but is an original number, and is sometimes cut out of the play on account of the difficulty of correctly rendering it. traditionary lore, leaving no reasonable doubt in his mind that America was originally peopled from Asia.

Professor Campbell also establishes a family of languages or dialects in Europe, Asia, and America, which, in his opinion, conclusively prove the Asiatic origin of the North American Indian. The tumuli found throughout Asia mark, he thinks, the journeyings of the Hittite people, who, on their arrival here, crected the mounds now found in the Ohie Valley and in the basin of the Mississippi and its tributaries. The close resemblance which the mounds in Asia bear to those in this country goes far to establish the correctness of the Professor's conclusions. CHICAGO, September 29.—The crowd which witnessed the opening game between the New York and Chicago Base-Ball clubs for the possession of the national pennant was worthy of the oc-casion. It numbered 10,000, which exemplified in a remarkable way the interest taken in the result of the meeting of the two leaders in the League race. Rain-drops began to fall as the Chicagos went to the bat in the first chicagos went to the bat in the first inning, but it did not interfere in any way with the progress of the game, but throughout the nine innings the clouds were lowering. This did not prevent, however, a large attendance. The crowd was evenly balanced, as the visitors had hosts of admirers present, many of whom had journeyed here solely to see the game, and very many terest which heightens with the lapse of years. The mounds are fast disap-pearing, and with them will vanish every trace of a people who inhabited this continent at a period so remote as this continent at a period so remote as to border on mythology. The story of their coming and their going is buried with them. We can speculate and theorize, but we cannot penetrate the mystery of the grave. Professor Campbell's theory is ingenious and even plausible, but it is not convincing. solely to see the game, and very many of the leading eastern and western newspapers had representatives present. The crowd cheered the New Yorkers whenever they made a good play, and became frantic in the first and ninth innings when the Chicagos began their run-getting and when the last man of

The Mound-Builders.

What are usually called Indian

mounds are quite common in this coun-

try. The one at McKee's Rocks, which

was explored recently, attracted wide attention both on account of its unusual size and of the variety of implements

it was found to contain. Recent dis-

coveries of much the same nature in

Manitoba have called out opinions from

some of the most eminent scientists of

that country, who have advanced va-

rious opinions as to when and by whom

these miniature pyramids were reared.

Professor Campbell, of Montreal, advances the theory that the mounds are

not the work of Indians at all, but that

they are the remains of the Hittites of

Scripture, who emigrated from China

to America, and of whom the Indians

are the lineal descendants. He thinks

that the Hittites, on the capture of their

capital on the Euphrates by the Assyrians in 717 B. C., took refuge in the

Caucasus, and thence were driven east

ward to the Punjaub, from the Punjaub

to the Songari, and thence to Corea, Japan, Kamschatka, and the Aluntian

Islands, the last named being the step-ping-stones by which they reached North America.

T. CHRISTIAN,

It is worthy of remark, in this con-ection, that Mr. George Wardman, of this city, who spent several years in Alaska in the service of the Government, anticipated Professor Campbell in the promulgation of this theory, and is fairly entitled to all the credit that may grow out of it. Mr. Wardman, who had unusual facilities for the investigation of the subject haved his
